

34.99.99.R0.02 Vehicle/Pedestrian Sidewalk Traffic

Approved August 28, 2006

Revised June 8, 2009

Procedure Statement

Texas A&M University-Commerce desires to make the campus easily accessible to students, faculty, staff, and visitors; however, certain restrictions apply to the campus walkways.

Reason for Procedure

To protect the safety of pedestrians and to prevent damage to campus walkways and other facilities, A&M University-Commerce has developed the following guidelines concerning the use of campus sidewalks.

Procedures and Responsibilities

1. Unauthorized vehicles will not be allowed on campus sidewalks. Authorization to use a vehicle on campus sidewalks must be obtained from the University Police Department. Offices that need to transport items to or from vehicles on a regular basis should use dollies or request facilities personnel to move the items.
 2. Drivers of service vehicles should access buildings from designated exterior routes and not along the walkways.
 3. Bicycles, which are addressed in article XVI of the Texas A&M University-Commerce Traffic and Parking Rules and Regulations, are excluded from this requirement.
 4. This procedure does not apply to Motorized Mobility Devices as defined by the Texas Transportation Code § 542.009.
 5. The vice president for business and administration, or designee, will be responsible for enforcement of the above procedures and for the development of other measures related to sidewalk safety.
